

8. Fortune Cookies

Student learning outcomes

- Students will use JavaScript to draw a random saying from a list of sayings.

Real world applications:

- Students will explore random numbers.
- Students will explore hacker culture.
- Students will be exposed to the wisdom (and humor) of the ages.

Assignment requirements:

- This page displays a random fortune from an array of sayings.
- The page has a "new fortune" button that refreshes the page with a new fortune.
- New concepts in this lesson:
 - Creating an Array of Strings
 - Random numbers, random integers
 - `Math.floor()`, `Math.random()`
 - `String.replace()`
 - Google Fonts
 - Centering content vertically on the page using CSS or JavaScript
